PROFESSIONAL SUMMARY

DevOps Engineer with 4+ years of experience supporting cloud-native infrastructure, Kubernetes platforms, CI/CD pipelines, and infrastructure automation across AWS and GCP. Hands-on experience with Terraform, Docker, Helm, Argo CD, GitOps, and production observability. Experienced in managing microservice deployments, developing reusable Helm charts, automating infrastructure provisioning, and supporting production systems across cloud and hybrid-cloud environments.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, GCP, hybrid-cloud environments, EC2, VPC, load balancers, MSK, Lambda, SSM, VPN tunnels, Cloud Composer
Containers & Platform: Kubernetes, Docker, Helm, Karpenter, Istio, KEDA, AKS, EKS, GKE, Secrets Store CSI Driver
Infrastructure as Code & Automation: Terraform, Ansible, scripting
CI/CD & GitOps: Jenkins, Azure DevOps, Concourse CI, Argo CD, Git, GitHub
Observability & Operations: Prometheus, Grafana, CloudWatch, Datadog, Zabbix, Fluent Bit, EFK/ELK, Nginx, Cloudflare, Linux
Data & Application Platforms: Kafka, Cassandra, PostgreSQL, MinIO, Redis, Ruby on Rails, Passenger

PROFESSIONAL EXPERIENCE

Quest Global Engineering Services Pvt Ltd — Jan 2025 – Present

Senior DevOps Engineer

- Manage Kubernetes-based production infrastructure and deployment workflows for a healthcare platform supporting ECG-related applications.
- Implement and maintain Kubernetes platform components including Karpenter, Istio, KEDA, Fluent Bit, Prometheus, and Secrets Store CSI Driver.
- Develop and maintain reusable Helm charts for microservices to support standardized deployments across environments.
- Coordinate infrastructure setup, deployment planning, release transitions, production monitoring, and troubleshooting.
- Collaborate with development and platform teams to improve deployment consistency, scalability, observability, and operational reliability.

Activelobby Information Systems Pvt. Ltd — May 2023 – Jan 2025

DevOps Engineer

- Automated routine operational tasks using scripting, reducing manual effort by 40%.
- Provisioned AWS and GCP infrastructure with Terraform, including EC2, load balancers, VPCs, MSK, SSM, VPN tunnels, Lambda, and Cloud Composer.
- Managed Kubernetes clusters and supported CI/CD pipelines and automated testing to strengthen deployment workflows and release reliability.
- Configured monitoring with CloudWatch, Zabbix, and Datadog, and implemented EFK/ELK logging for Kubernetes environments.
- Automated system configuration with Ansible and supported on-call incident response for production systems.

Apton Works Pvt Ltd — Nov 2021 – May 2023

Junior DevOps Engineer

- Built and maintained CI/CD and GitOps workflows using Concourse CI and Argo CD.
- Containerized applications with Docker and applied multi-stage builds to reduce image size.
- Migrated applications from cloud virtual machines to Kubernetes clusters.
- Deployed Ruby on Rails applications using Passenger and managed GitHub repositories, branching strategies, and releases.
- Configured Cloudflare DNS and canary endpoint checks using Cloudflare and CloudWatch.

SELECTED PROJECTS

Healthcare ECG Platform

- Supported Kubernetes infrastructure and CI/CD workflows for healthcare microservices serving web and mobile applications.
- Implemented platform components including Istio, Karpenter, KEDA, Fluent Bit, and Prometheus.
- Developed reusable Helm charts and supported production observability and release management.

Multi-Cloud Cryptocurrency Cashback Platform

- Provisioned AWS and GCP infrastructure with Terraform across development, QA, staging, and production environments.
- Deployed applications on private EKS and GKE clusters, automated releases with Argo CD, and configured EFK logging.
- Supported data-pipeline infrastructure for AWS and GCP data migration.

OTT Streaming & Video Analytics Platform

- Supported hybrid-cloud infrastructure for streaming and video analytics workloads.
- Worked with Kubernetes, AKS, Kafka, Cassandra, PostgreSQL, MinIO, Redis, and Cloudflare to support monitoring, automation, and platform reliability.

EDUCATION

Bachelor of Science in Computer Science
Emmanuel College, Kerala | University of Kerala | 2018 – 2021
